REDEFINE WHAT'S POSSIBLE FOR YOUR AERIAL LIFT FLEET

Horton's Aerial Lift insurance program provides timely, hands-on and industry experienced support to your organization. By utilizing an aggressive approach to promote enhanced risk management, safety training and compliance, your fleet will be in the best position for the safety of your workers and the future of the business.

Taking your Aerial Lift Program to a Higher Level of Performance

Build on your existing momentum to redefine what is possible with your insurance and employee benefits programs. Going beyond traditional insurance programs by focusing on culture, change management, and accountability can drive superior safety and risk management performance.

We recognize the direct correlation between the prevention of losses, the costs associated with insuring your aerial lift fleet and the benefits of taking proactive steps to mitigate known industry specific areas of risk prior to a loss occurring. The installation of the OEM Data Delivery Fasten Tracker Lanyard Attachment Warning System will help you achieve the goal of 100% fall protection utilization by your fleets lift operators and provide data storage and recovery of aerial lift operations events. The Fasten Tracker LAW System is an aid in verifying and improving existing aerial lift safety programs, productivity and creating a positive work culture.

Benefits of Our Program

- 40 years of experience working with and insuring aerial lift fleets
- Expanded resources to reduce and mitigate claims (i.e. falls, overturn of equipment)
- Strong working relationship development to achieve optimum results for your business
- Access to aggressively market to preferred insurance carriers
- Competitive pricing with efficient quoting process
- Available Telematics platform data recovery of lift operator events
- Verify and improve safety, productivity and a positive work culture
- **Utilization of the Fasten Tracker™ Lanyard Attachment Monitoring System (www.oemdd.com)**
- **Further reduced rates upon installation of the Fasten Tracker™ Lanyard Attachment Monitoring System**
